Haoxin Ni

Baton Rouge, LA | hni3@lsu.edu | +86 181 6887 7256

Research Appointment

Louisiana State University (LSU) 14 Aug 2026 - Present
Graduate Research Assistant (RA)
Department of Oceanography & Coastal Sciences (DOCS)
Advisor: Dr. Wengui Liang

Education

Louisiana State University Fall 2026 - Present
M.S. in Oceanography and Coastal Science (in progress)

University of Reading
B.Sc. (Honours), Atmospheric Sciences Sep 2022 - Jun 2026
Upper Second-Class Honours (2:1); degree awarded 8 July 2026.

Nanjing University of Information Science and Technology (NUIST)
Bachelor's Degree in Natural Sciences, Atmospheric Science Sep 2022 - Jun 2026
Compulsory-course weighted average: 80.853; GPA: 3.102.
Joint NUIST–University of Reading 4+0 programme, delivered at NUIST.

Undergraduate thesis: *Asymmetric Response of Summer Deep Convective Clouds over the WNP to Decaying ENSO: Vertical Structure, Decadal Weakening, and Typhoon Impacts.*

Selected Academic Projects

Climate Change: Final Project Dec 2024

- Evaluated solar and volcanic forcing through controlled climate-model experiments and RMSE analysis; omitting natural forcings increased model error by 13%. Used step-response experiments to study transient and equilibrium responses to climate feedback parameters.

Climate Change: Python Modelling Oct - Nov 2024

- Used a Python energy balance model to quantify CO_2 radiative forcing and temperature responses. Estimated equilibrium climate sensitivity at 2.47 K; cloud feedback uncertainty yielded a range of 1.48–7.42 K.

Atmospheric Numerical Modelling and Statistics May - Jun 2024

- Analysed Nanjing dew point observations and model output using correlations, ordinary least squares regression, and normal-distribution fitting. Evaluated summer discomfort forecasts (dew point $\geq 22\,^{\circ}\mathrm{C}$) using contingency tables, critical success index (CSI), and probability of detection (POD).

Atmospheric Physics: Cloud Microphysics Mar - Apr 2024

- Simulated mixed-phase cloud evolution and the Bergeron–Findeisen process; tested sensitivity to ice crystal concentration and supersaturation. Proposed latent heat release and non-spherical ice crystal geometry to improve model realism.

Leadership & Activities

Planner, University Student Union Sep 2023 - Sep 2025
Planned and organised campus club exhibitions in collaboration with team members.

Deputy President, Atmospheric Science Association Mar - Apr 2024
University of Reading; coordinated an educational visit to the Nanjing Pukou District Meteorological Observation Station.

Skills & Languages

Computing: Python, Linux, NCL (NCAR Command Language), Microsoft Office.
Languages: Chinese (native); English (fluent).
Interests: Calligraphy, erhu, basketball, jogging, travel.
